INTRODUCTION TO EURO STEEL

EUROSTEEL operating with highly qualified and decades of experienced staff with reputed companies on various high level projects in the Gulf region.

Company policy and obligations is to satisfy Customer's needs and expectations in terms of product Quality and Services, understanding Customer needs and providing them the right and efficient solutions under focussing on establishing long lasting relationships.

The Engineering department, comprising a team of highly qualified experts to ensure the right choice of selecting the materials and the finished product is complying with Customer's specified requirements.

The Installation department being developed, implementing a stringent and highly complex preventive installation system for all our projects to ensure the right condition of equipments for the sake of smooth operations.

Depending on the previous reasons, Eurosteel for Steel Building was able to gain the admiration and trust of Kirby modern buildings, and to be one of the most important suppliers and distributors to Kirby Steel in the State of Qatar.

VISION

EUROSTEEL is in the race against time to be one of the best recognized companies for design, manufacture, supply, and erection of Pre-Engineered Steel Buildings (PEB) and Structures.

MISSION

To be recognized as the global leader for the design, manufacture, supply and erection of Pre-Engineered Steel Buildings (PEB) and Structures. EUROSTEEL will achieve this vision by consistently delivering high-quality products to our customers, accompanied by personalized service and a commitment to excellence.

VALUES

Straight-talking: We encourage open debate where the best ideas win.

Customer centric: We put our customers at the center of our focus and initiatives with the objective of providing them with unmatched levels of services and products.

Teamwork: We actively share information and ideas, enthusiastically working to make those around us better.

Diversity and respect: The diversity of our workforce is an asset and we treat everyone with dignity and respect regardless of status, gender, education, ethnicity or religion.

Empowerment: We empower people to make decisions with a bias for action.

Employees as core assets: We believe that our employees are our most valuable resource, and do whatever it takes for their continuous training, development and motivation.

Meritocracy: The rewards and career advancements of our people are based on their performance and capabilities, not on their wasta (influence).

There are various applications of PEB as Mentioned below

Factories
Warehouses
Supermarkets
Aircraft Hangar
Metro Stations
Shipyards
Showrooms, Workshops, Offices
Schools, Hospitals, Site Offices
Fuel Stations, Bus Shelters, Car Parks
Cold Storages
Shopping Malls

PRE-ENGINEERED BUILDINGS

PEB is a steel structure built over a structural concept of primary members, secondary members, and the cover sheeting connected to each other. The structural members are custom designed to be lighter in weight and high in strength. It can be fitted with different structural additions like trusses, mezzanine floors, fascia, canopies and crane systems as per user requirements.

There are many advantages of PEB as mentioned below

Single source responsibility

Faster Installation

Economical

Factory- controlled quality

Practically maintenance free

Upto 90 M clear spans

Flexibility in expansion

Energy efficient roof and wall systems

Earthquake- resistant

Building Components

1. KR Roof Panel
2. KR Wall Panel
3. Canopy
4. Roll Up Door (Manual/Electrical)
5. Double Slide Door
6. Rake Trim
7. Sky Light (Translucent Panel)
8. Ridge Ventilator (With Bird Mesh)
9. Power Ventilator
10. Eave Gutter
11. Louver With Bird Mesh
12. Masonry Trim
13. Window With Insect Screen
14. Downspout

- 15. Single Walk Door
- 16. Curved Eave
- 17. Industrial Louver
- 18. Corner Trim
- 19. Eave Trim
- 20. Flush Fascia
- 21. Strip Skylight

- 22. Roof Monitor
- 23. Double Walk Door
- 24. Rood Extension
- 25. Return Downspout
- 26. Brick Wall
- 27. Wall Light (Translucent Panel)
- 28. Curved Cantilever Fascia

Building Components (contd.)

- | | |
|------------------------------------|-------------------------------------|
| 1. Concrete Footing | 8. Framed Opening (Window/Louwer) |
| 2. Anchor Bolts | 9. End Wall Wind Column |
| 3. Base Plate | 10. Roof Bracing (Angle/Rod/Cables) |
| 4. End Wall Girt | 11. Main Frame Rafter |
| 5. Portal Bracing | 12. Jack Beam |
| 6. Main Frame Straight Column | 13. Main Frame Tapered Column |
| 7. Wall Bracing (Angle/Rod/Cables) | 14. Cantilevered Fascia Frame |

- 15. Lean To Frame
- 16. Crane Beam
- 17. Crane Column
- 18. EOT Crane
- 19. Roof Purlin
- 20. Flange Brace
- 21. Sag Rod

- 22. Eave Strut
- 23. Side wall Girt
- 24. Flush Fascia Frame
- 25. Cage Ladder
- 26. Deck Panel with Steel Mesh
- 27. Hand Rail (Steel)
- 28. Staircase (Checker plate/C channel)
- 29. Crane Bracket

STRUCTURAL SYSTEM

Structural systems are the main load carrying and support members of a pre-engineered building. The shape and size vary based on application and requirements.

The main frame members are the main load carrying member of a structural system which include columns, endwall posts, rafters and other main support members.

All structural steel sections and welded plate members shall be designed in accordance with the applicable sections, relating to design requirements and allowable stresses, of the latest edition of the American Institute of Steel Construction "Specification for the Design, Fabrication and Erection of the Structural Steel for Buildings"

General guidelines on recommend frame types for different width are given below:

Main Frames

■ L - CANOPY(L-CAN)

■ LEAN-TO (L-TO)

■ BUTTERFLY CANOPY (T-CAN)

■ SPACE SAVER (S V)

■ SINGLE SLOPE (SS)

■ RIGID FRAME (RF)

■ BEAM AND COLUMN (BC1-)

■ BEAM AND COLUMN (BC2-)

■ BEAM AND COLUMN (BC3-)

■ MULTI-SPAN (MS)

Suggested width range (meters) for most economical buildings
 Standard Eave height: 3M/8-M; Std bay spacing: 6M/7.5M/9M;
 Standard Loadings: Live load: 1.0/0.6/0.5 KN/M², Wind load: 1.25/1.0/0.75 KN/M

Mezannines

Standard Mezzanine Floor Systems consist of galvanized profiled steel deck, joists, beams and intermediate support columns. Main beams can span in lateral directions and joists in longitudinal directions.

Crane Beams

Buildings can be designed to support any required crane system. Generally, overhead travelling cranes up to 15 MT are supported on brackets. For higher capacities, an independent support system is provided. Crane support for overhead travelling cranes includes brackets, beams and bracings.

Fascias and Canopies

Euro Steel provides fascias specially designed to your requirements. These can be either vertical, horizontal or with curved sheeting to enhance the architectural look of your building. Wall canopies at eaves, endwall, over doors and windows are also available.

SECONDARY MEMBERS

Secondary structural framing refers to purlins, girts, eave struts, wind bracing, Flange bracing, base angles, clips and other miscellaneous structural parts.

Purlins, girts and eave struts are cold form steel members which have a minimum yield strength of 345 MPa (50,000 psi) and will conform to the physical specifications of ASTM A1011(Grade 50) or ASTM A653- (Grade 50).

Purlins & Girts

Purlins and girts are roll formed Z sections, 200 mm deep with 64 mm Flanges shall have a 16 mm stiffening lip formed at 45° to the Flange

Eave Strut

Eave struts are 200 mm deep with a 104 mm wide top Flange, a 118 mm wide bottom Flange, both are formed parallel to the roof slope. Each Flange has a 24 mm stiffener lip. Structural members are located along the sidewall; at the intersection of the planes of the roof and wall. It is constructed from cold formed 'C' sections and is rolled to suit the roof slope. This member transmit longitudinal wind force on the end walls from roof brace rods to wall brace rods.

C – Section

C- Sections are 200mm deep with a 100mm Flange. The Flanges are perpendicular to the web and have a 24mm stiffening lip.

Bracings

The Cable Bracing is a primary member that ensures the stability of the building against forces in the longitudinal direction such as Wind, Cranes, and Earthquakes.

Specifications

1. Cables are made of galvanized extra high strength seven strand cable of 2/1" diameter conforming to ASTM A2003 – 475 Class 1 (G40).
2. Terminals are made of galvanized (G25) 40mm diameter rods conforming to ASTM A36
3. Hill side washers are made of aluminum or galvanized cast iron.

Advantages

- Higher strength 120 KN ultimate tensile strength
- Better corrosion resistance (Galvanized)
- Easy packing and shipping (Round Packing)
- Cable can be fabricated and shipped for any required length.
- Easy erection.
- Light weight

CLADDING SYSTEMS

Panel Profiles

EuroSteel offers five types of affordable, durable and easy -to-install cladding panels to enhance the visual appearance of our customers buildings.

EuroSteel Roof (KR)

EuroSteel Roof profile is strong and cost effective and was developed specifically for roofing applications. The bearing leg design permits easier installation and maintenance, supports thicker layers of insulation and allows easier curvature for a visually appealing finish.

Coverage Area: 1000mm

Rib Depth: 32mm

EuroSteel Wall (KW)

EuroSteel Wall is a cost effective, partially concealed fastener panel with a sculptured valley shape between the major ribs for a superior architectural look for external walls.

Coverage Area: 1000mm

Rib Depth: 26mm

KR Cladding Systems (KCS) (Middle East & Africa Region Only):

KCS profile offers extra strong resistance to wind & gravitational loads and can be used for roofing, wall and decking applications. KCS was developed by KR specifically to meet more stringent design load requirements.

Coverage Area: 1000mm

Rib Depth: 40 mm

EuroSteel (KR) Concealed Fastener

The concealed fastener single skin cladding type KC is used for exterior wall cladding and internal wall and roof liners. The panels have interlocking tongue and groove joints. The standard panels are available in 0.6 mm nominal thickness.

Coverage Area: 1000mm

STANDING SEAM ROOF SYSTEMS

KLS 10

These panels help eliminate cracking and / or blistering which is common in other roof materials. It also allows roof movement for expansion and contraction along with panel strength and durability.

KSS 20/18

These panels have a vertical standing seam design and are highly Flexible with concealed fasteners. They provide weather tight Field seaming with no end closures. These panels enhance appearance in addition to exceptional durability and corrosion resistance. This system is architecturally compatible in various applications.

EuroSteel KR Deck

EuroSteel KR Deck Panels are used in high rise buildings, office buildings and mezzanine floors in industrial buildings and warehouses. These decks can be used as a permanent shuttering to support the wet concrete and help in creating composite slabs and floor beams. The continuous flange stiffeners and deep embossments increase the load carrying capacities. They provide for a stable and rigid working platform without any need of propping. These panels are roll formed from hot dip galvanized coils of 345 MPa with thickness starting from 0.6 mm to 1.2 mm.

EuroSteel KR Deck with 55 mm depth
(South East Asia region)

EuroSteel KR Deck with 54 mm depth & Kirby Deck with 75 mm depth
(India region only)

Kirby Deck with 41 mm depth
(Middle East & Africa region)

EuroSteel KR Standard Colors

EuroSteel KR offers a wide range of top coats including polyester, silicone-modified polyester and

Middle East & Africa

Polyvinylfluoride (PVF2) in six standard color options. We can support requirements for RAL colors on request.

INSULATION

Insulation Material-Properties And Performance
Insulation Foam

INSULATION DATA: THERMAL CONDUCTIVITY AT 25 °C MEAN TEMPERATURE		
	POLYURETHANE	FIBERGLASS
Density	40 Kg/m ³	12 Kg/m ³
BTU/ft ² h.°F	0.14	0.29
KCAL/m ² h.°C	0.017	0.035
W/m ² .K	0.0198	0.041

Polyurethane Insulation

ES sandwich panels use high pressure injected polyurethane foam that is CFC Free, self extinguishing, can withstand intense heat, contains extreme low temperature and offers very low rates for water absorption and vapor transmission.

The injected foam also provides excellent adhesion to the panel's sheeting.

Fiber Glass Insulation

Fiber Glass insulation is a thermal and acoustic insulation that consists of intertwined and flexible glass fibers, which enables it to "package" air, resulting in low density that can be varied through compression.

It is fire safe and CFC free which does not emit toxic smoke. Fiber Glass insulation is laminated to steel facing with special chemical glue, completely filling the insulation cavity.

THERMAL HEAT TRANSMISSION FOR FIBER GLASS INSULATION				
THICKNESS OF INSULATION mm	"U" VALUES			
	AT ROOF		AT WALL	
	KCAL/m ² h.°C	BTU/ft ² h.°F	KCAL/m ² h.°C	BTU/ft ² h.°F
50	0.500	0.102	0.548	0.112
75	0.371	0.076	0.397	0.081
100	0.295	0.060	0.311	0.064
150	0.215	0.044	0.220	0.045

POLYURETHANE INSULATED PANELS

EuroSteel Insulated Sandwich Panels

EuroSteel sandwich panels are a cost effective solution for long lasting, modular construction.

Strong and versatile, EuroSteel sandwich panels allow for fast on-site assembly and simple retrofit of existing buildings. Further, the Polyurethane foam insulation delivers substantial savings on equipment and operation for the heating and cooling of buildings.

Finally, EuroSteel sandwich panels are durable and resistant to harsh weather conditions, reducing the recurring maintenance cost of the building.

EuroSteel Sandwich Panels – Product Range

EuroSteel Sandwich Panels offer highly durable, light weight, sound proof panels which are quick to install or rearrange.

EuroSteel Sandwich Panels can be applied to new metal

building constructions, to existing substructures, or over an existing roof or wall that is in need of repair and also provide higher insulation values.

It provides smooth visual finish for you external and internal Walls.

We offer four types of Sandwich Panels - EuroSteel Roofing Insulated Panel, EuroSteel Wall Insulated Panel EuroSteel Concealed Fastener Insulated Panel and EuroSteel Fiber Glass Insulated panel .

The sandwich panels use the regular EuroSteel panel profiles, and are available in Aluminum and Steel Material and EuroSteel Standard colors.

Trim/Flashing

EuroSteel sandwich panels, trims & flashing match the same specification as panel materials. They are furnished for rakes, corners, eaves, and framed openings to provide weather tightness and a smooth finished appearance.

We also supply a wide range of coordinated accessories for complete insulated panel roof and walls installations, consists of translucent panels, ventilators, roof curbs, roof jacks, doors (personnel, sliding and roll-up), windows and louvers.

POLYURETHANE INSULATED PANELS

Roofing Polyurethane Insulated Panel

EuroSteel is one of the premier roofing systems available today, is a strong, weather-tight. The large panel size reduces the number of joints, and the high corrugation overlap joint reduced water leakage.

THERMAL HEAT TRANSMISSION (U-VALUE) FOR POLYURETHANE INSULATED PANEL						
	KRIP 40	KRIP 50	KRIP 60	KRIP 65	KRIP 75	KRIP 100
BTU/ft ² h, °F	0.085	0.070	0.059	0.055	0.048	0.037

STRUCTURAL STEEL

Pre-Engineered Buildings

- Production is based on Individual Project Specifications.
- International approved Standards, Work Procedures and Quality Assurance System.
- Accurate detailing and manufacturing techniques assure correct appearance and perfect fit at site.
- Design & Production System is integrated with that of the building structure – Ensuring on-time delivery.
- Our policy and obligations is to satisfy Customer's needs and expectations in terms of product Quality and Services.

Applications

- Aircraft Hangers
- Industrial Buildings
- Warehouses
- Workshops
- Commercial Buildings
- Retail & Wholesale Centers
- Camps Accommodations
- Offices
- Schools
- High Rise Buildings
- Villas

LIGHT GAUGE COLD-FORMED STEEL BUILDINGS

Advantages

- Safety against high seismic forces and cyclonic conditions.
- High Strength to weight ratio, resulting in economy.
- Dismantable & Relocatable.
- Single source of supply of entire building.
- Speedy delivery & faster erection.
- Insulated to suit various weather conditions.
- Flexible design to accommodate utility lines like plumbing, wiring, etc.
- Enhanced aesthetics.

Applications

- Health Centers
- Community Centers (Anganwadi)
- Schools
- Site Offices
- Mass Housing
- Relief Camps
- Labour Camps
- Military Camps

Special Features

- Spans up to 15 m.
- Clear height up to 3.0 m.
- Variety of sheetings: Galvanized, Galvalume (in various colours).
- Wall Options - sheeted, blockworks.
- Covered ceilings - Roof Liners.
- Insulation for Roof and Wall.
- Partition Walls.
- Customized Designed.
- Special accessories like doors, windows, ventilators, etc. can be provided.

ACCESSORIES (KR)

Roofing Accessories

				
<p>SKYLIGHTS AND WALL LIGHTS Made of translucent GRP to match Kirby roof and wall panels, with an estimated light transmitting capacity of %60.</p>	<p>RIDGE VENTILATORS Gravity type with bird screen and Mechanical control Damper, standard size is 3000 mm long with a throat opening of 300 mm.</p>	<p>POWERED VENTILATORS Kirby 'C' whirlwind low silhouette extract ventilator with spun aluminum non-return shutter and one piece base and throat. Mounted on GRP roof curb moulded to suit Kirby rib roof panels.</p>	<p>ROOF JACKS Enclosure for pipes or stacks projecting from the roof; 2mm thick GRP to fit Kirby roof panel. Available in opening sizes for 50 mm to 300 mm diameter.</p>	<p>ROOF CURBS Enclosure for ducts or other roof projections. 2 mm thick glass fibre reinforced plastic fitting Kirby Rib roof panels. Available in opening sizes 600 mm, 900 mm and 1200 mm squares.</p>

Windows and Louvers

		
<p>LOUVERS Fixed, adjustable and sand trap louvers with overlapping blades allowing free air flow. Size is 1 m x 1 m. incorporating insect screen, hand crank and blade adjustment lever.</p>	<p>SAND TRAP LOUVERS This louver consists of different form of flashings arrangement in a predetermined manner in order to create a sand trap. The dual advantage of the sand trap louver is not only help in natural ventilation but also act as a sand trap at the same time size is 1 m x 1.2 m and 2 m x 1.2m</p>	<p>ALUMINIUM WINDOWS Designed for installation with Kirby wall panel, double slide, self flashing with pre-glazed clear glass and removable half insect screen. Standard size is 1 m x 1 m. Multiple windows can be formed by joining the jamb fins together.</p>

Doors

		
<p>SLIDING DOORS (SINGLE OR DOUBLE LEAF) 3 m, 4 m and 5 m wide and 3 m to 5.5 m high. Other sizes are available on special order.</p>	<p>WALK DOORS(SINGLE OR DOUBLE) 915 mm or 1830 mm wide x 2134 mm high made of 20 gauge electrogalvanised steel with a core of polyurethane insulation. Door fixture is provided.</p>	<p>AIRCRAFT HANGAR DOORS Kirby provides solutions for special applications such as aircraft hangars, customized hangar doors and framing, customized support systems for special equipment and maintenance cranes.</p>

Other Accessories

	
<p>FASTENERS Standard fasteners shall be No. 14, Type A, self drilling screws with metal and neoprene washers. All screws shall have hex heads and are zinc plated.</p>	<p>SEALANT Flexible sealer tapes made from Butyl rubber for sheeting sidelaps, endlaps and accessories.</p>

GUINNESS WORLD RECORDS CERTIFICATE

Dear Participant,

I am delighted to present you with this Certificate of Participation to recognize your important contribution to this GUINNESS WORLD RECORDS title.

At Guinness World Records, we have been measuring, verifying and recording the world's achievements since 1954. Today, our mission is to maintain an archive of records that inspires, engages and entertains people across the globe, and celebrates the world's best.

The record that you participated in is now one of the 40,000 world records that are held on the GUINNESS WORLD RECORDS database. Of the thousands of applications we receive every month, less than 5% actually make it to become an official entry in our archive. As a member of this select group, you should be extremely proud of your achievement.

On behalf of Guinness World Records, I would like to personally congratulate you on your GUINNESS WORLD RECORDS achievement.
